(54) Title: **METHOD FOR PRESENTING LOCATION INFORMATION ON A MOBILE TERMINAL**

(57) Abstract: The invention relates to handling messages containing landmarks, or landmark related services on a mobile communication terminal. The landmarks are handled by using a message for transmission through a wireless cellular communication network, with a syntax that comprises a header part for defining sender/receiver message nature, an identification part for identifying the service, a landmark part for containing location information of one or more objects and a provisioning part for indicating a desired service.
